Figure 5.4 Function Page

You can set the relevant parameters of user function, set the parameters of the machine, query the historical fault information, and restore the installation parameters to the factory, etc.

5.4 App Control

The "KINGHOME PLUS" App can be used to remotely control the thermostat.

- (1) Please scan the QR code on the cover or search for "KINGHOME PLUS" in the Apple App Store or Google Play Store to download.
- (2) After the "KINGHOME PLUS" App is installed, new users will need to register an account and add the device to achieve WiFi control and LAN control of KINGHOME smart home appliances.
- (3) When using the App for the first time, please reset the WiFi. The steps are as follows:
 - Enter the function page from the homepage, then click the "User Setup".
 - Click "WiFi Reset" and click "Confirm" on the WiFi reset page to reset the WiFi.
 - 3) Add the desired device to the App.

NOTES:

- (1) If router's name and password have been changed, please reset WiFi and add the device again.
- (2) WiFi networking performance is related to the distance between the thermostat and the router and the obstacles between them. During the installation process, the distance between the thermostat and the router should be as close as possible, and the obstacles should be as little as possible. If the WiFi signal is not good, use the WiFi signal enhanced router. The specific situation depends on the actual installation.
- (3) For more information, please refer to "Help" in App.
