

KINGHOME CANADA BULLETIN

Title : Cased coil match

Author : François Lespérance

Issue : 14-05-2024

Revision : Rev 1 17-05-2024

Categorie : Ultranixx ECO

MODELS AFFECTED :

ULTRANIXX ECO	KD24UHO
ULTRANIXX ECO	KD30UHO
ULTRANIXX ECO	KD36UHO
ULTRANIXX ECO	KD42UHO
ULTRANIXX ECO	KD48UHO
ULTRANIXX ECO	KD60UHO

References :

Kinghome coil can be install with or without the case.

KCA24 and KCA36 using the same TXV and coil surface.

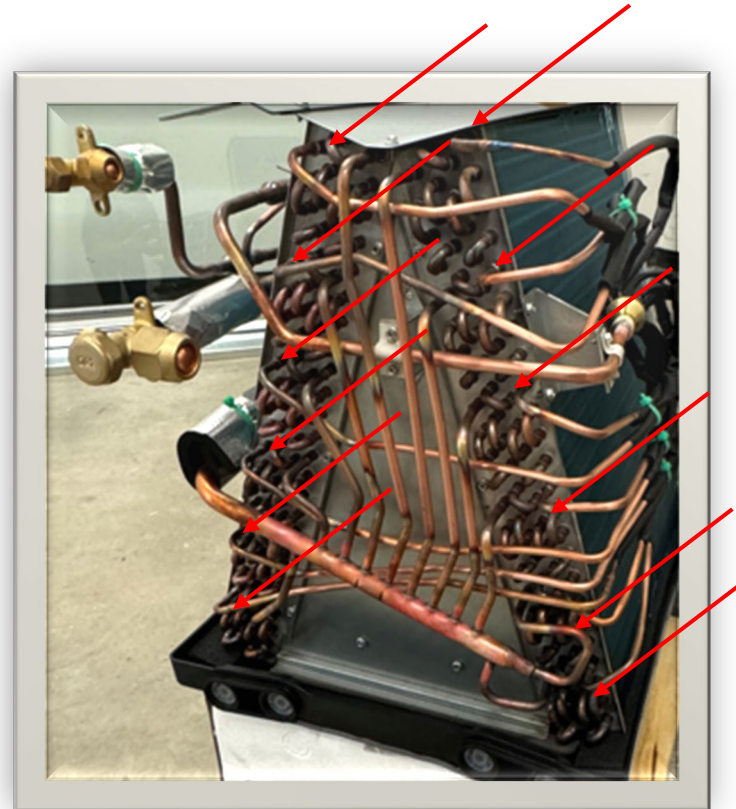

KCA48 and KCA60 using the same TXV and coil surface.

Kinghome coil distributor is connected at many levels of the coil freely allowing liquid refrigerant to make its way to all surface areas simultaneously at multiple levels and many level of the coil, this allow to feed with liquid refrigerant all the surface.

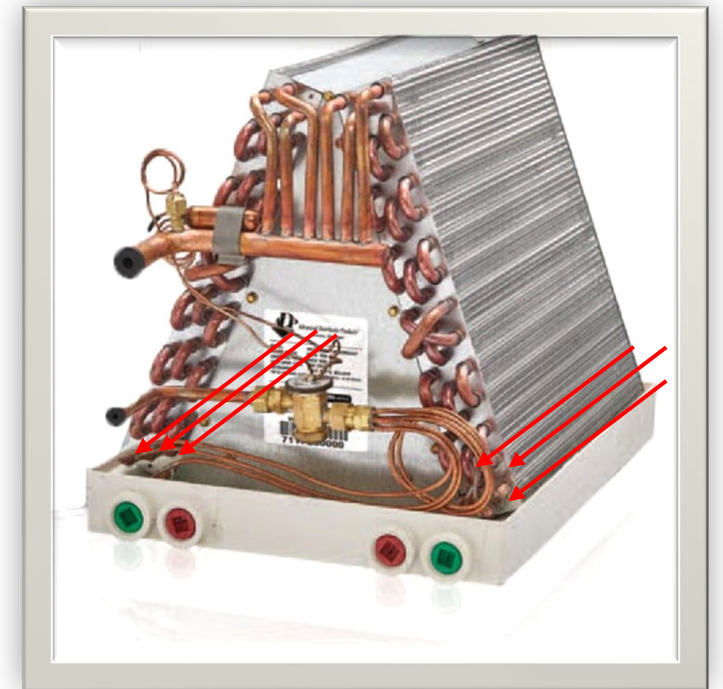

Standard coil distributor only feed from the bottom making them less efficient taking a longer time to generate results (often in testing resulting in much lower heating outputs in heat mode specifically).

Kinghome cased coil

*Kinghome uncased coil on field

Standard uncased coil
